

Phuket Yacht Haven – Gunite Slope Stabilization

Following slope vegetation clearance, soil trimming, benching and the installation of approx. 2,000 number 9.0-12.0m long soil nails, 200mm of reinforced shotcrete was applied to the 15m high slope surface by the dry spray or “Gunite” process.

All final surface trimming and profiling, reinforcing steel fixing and shotcrete works were carried out by skilled Hammersmith operatives.
